

AMENDMENT UNDER 37 C.F.R. § 1.111  
U.S. Application No. 09/772,940  
Attorney Docket No. Q62766

**AMENDMENTS TO THE SPECIFICATION**

**Please delete the present Abstract of the Disclosure and replace it with the following new Abstract of the Disclosure.**

An object of the present invention is to provide an information terminal having a security function in which confidentiality and safety, by which only a user who has stored a password can use, can be retained, and the information apparatus can be used ~~with-out~~ without inputting the password every time when the power supply is turned on. The user is identified by using the communication between an information apparatus and a battery pack to read out passwords, and a communication section controls to turn on a second switch when the passwords correspond so that power is supplied to a device load.
